ABSOLUTE FOR LEGAL SERVICES
PROTECT CLIENT PRIVACY AND YOUR FIRM'S TRADE SECRETS ACROSS DISTRIBUTED DEVICES

> "
>
> *If you want to be proactive by removing any sensitive data before a device is lost or stolen, and your end users' experience is important to you, Absolute is the product to get.*
>
> **Full-Service, National Law Firm**

RESPONSIBLE AND RESPONSIVE

To serve clients in the digital realm, law firms rely on timely and accurate information to guide every decision. Legal services require relentless visibility and responsive control to secure case and client data at all times.

TRUST BEGINS WITH ASSURANCE

Clients trust you. This trust is built on their belief that you will protect their interests (and their data) without wavering at any moment. But data has a new home, moving from central repositories to take up residency on laptops, tablets, smartphones, and cloud storage apps. In this fluid environment, law firms need continuous line-of-sight to every device, user, and app to be able to verify safeguards, demonstrate responsibility, and provide assurance to every client, everywhere.

For IT and security teams, this creates new challenges. When sensitive information — client, case, and your own intellectual property — is scattered, persistent visibility and control is non-negotiable; it is the foundation of the entire security program.

Law Firms' Security Challenges:

- Users accessing sensitive data on multiple devices
- Limited visibility to identify devices, data, users, and apps
- Inability to pinpoint sensitive data at-risk
- Lack of awareness when safeguards fail
- Slow response times when restoring controls

SOLUTION: DATA SECURITY ASSURANCE WITH PERSISTENT ENDPOINT VISIBILITY
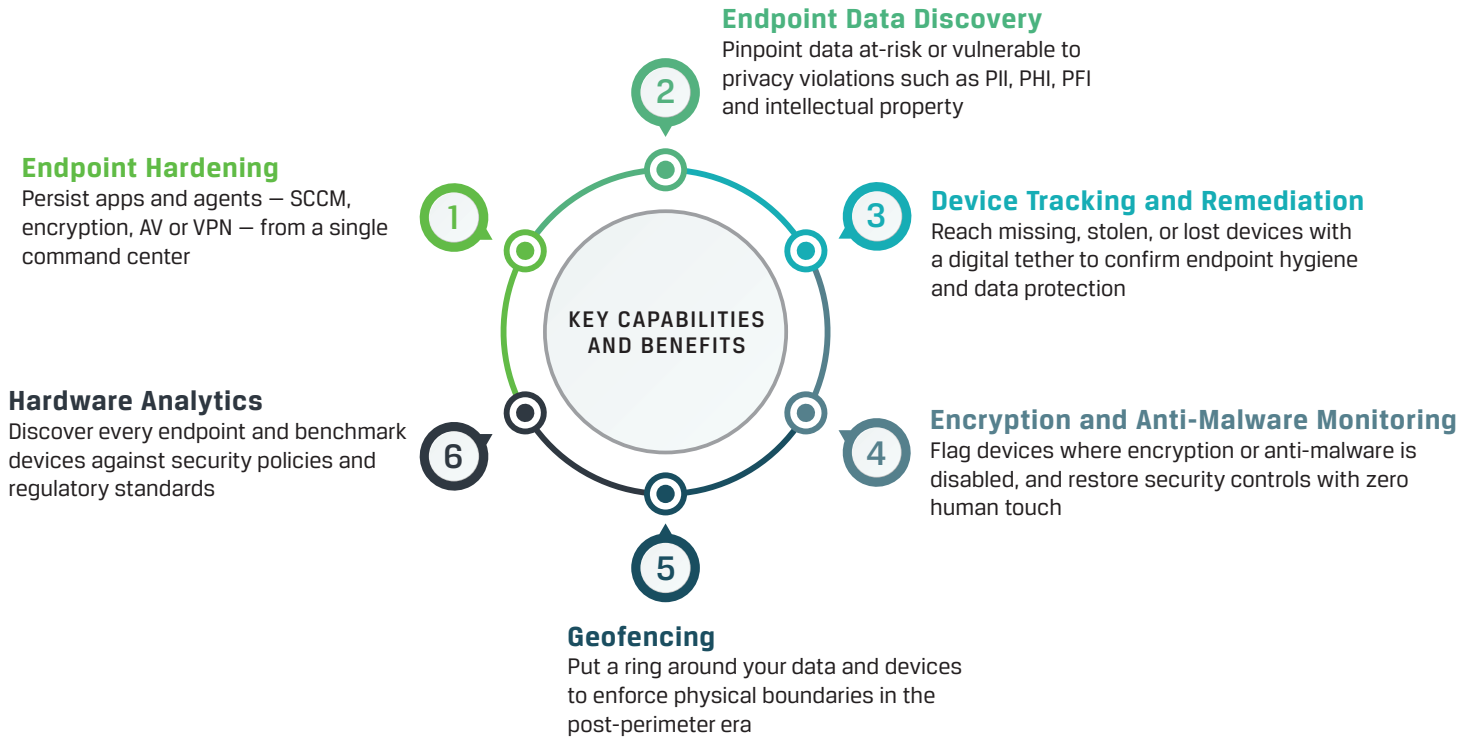

Absolute gives you persistent endpoint visibility and control — on and off the corporate network — enabling data protection with asset intelligence, automated endpoint hygiene, and continuous compliance across your device population.

Asset intelligence gives you detailed knowledge of devices, data, users, and apps. Hardware and software analytics identify waste, reduce costs, and mitigate risks when unauthorized apps and devices are discovered.

Only Absolute automates endpoint hygiene, because our patented Persistence® technology is embedded in the firmware at the factory. Once activated, your endpoints become self-healing machines, restoring controls and regenerating broken or disabled apps and agents.

Continuous compliance begins with a digital tether hooked into every device. Benchmarks and ongoing checks give you the confidence that every endpoint is airtight and audit-ready. Flexible control checks adapt to your internal policy and external regulatory standards, such as CCPA, GDPR, HIPAA, PCI, SOX, among others.

/ABSOLUTE®

Endpoint Data Discovery

2 Pinpoint data at-risk or vulnerable to privacy violations such as PII, PHI, PFI and intellectual property

Endpoint Hardening

1 Persist apps and agents — SCCM, encryption, AV or VPN — from a single command center

Device Tracking and Remediation

3 Reach missing, stolen, or lost devices with a digital tether to confirm endpoint hygiene and data protection

KEY CAPABILITIES AND BENEFITS

Hardware Analytics

6 Discover every endpoint and benchmark devices against security policies and regulatory standards

Encryption and Anti-Malware Monitoring

4 Flag devices where encryption or anti-malware is disabled, and restore security controls with zero human touch

Geofencing

5 Put a ring around your data and devices to enforce physical boundaries in the post-perimeter era

ABOUT ABSOLUTE

Absolute empowers more than 12,000 customers worldwide to protect devices, data, applications and users against theft or attack — both on and off the corporate network. With the industry's only tamper-proof endpoint visibility and control solution, Absolute allows IT to enforce asset management, security hygiene, and data compliance for today's remote digital workforces. Patented Absolute Persistence is embedded in the firmware of Dell, HP, Lenovo, and 26 other manufacturers' devices for vendor-agnostic coverage, tamper-proof resilience, and ease of deployment. See how it works at **absolute.com** and follow us at **@absolutecorp**.
