

DATA SHEET

# Absolute Core

The only enterprise VPN built from ground up for mobility and the modern edge

absolute.com

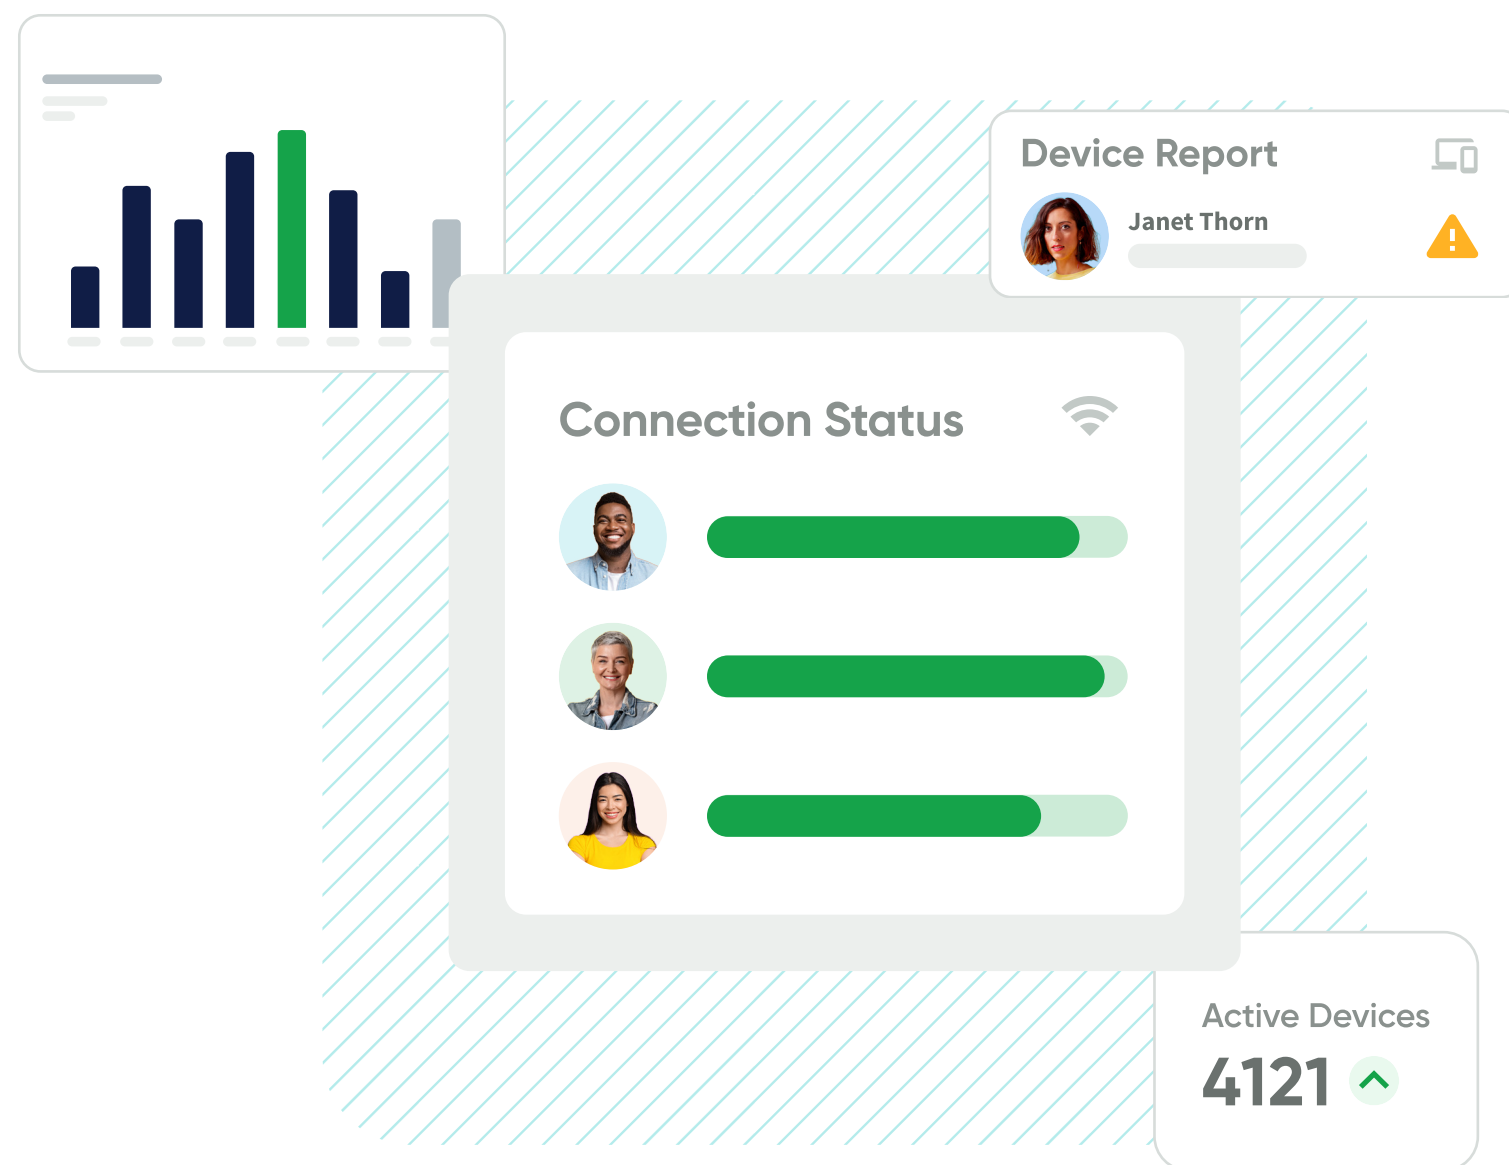

As enterprises embrace flexible hybrid work policies, their data and applications can—and will—be accessed from all over the world. This reality has dramatically expanded the attack surface organizations must protect to support the increase of remote and mobile workers connecting to critical applications. At a minimum, businesses must have a secure, robust enterprise VPN in place that gives their employees a frictionless work experience.

Users who need to access the corporate network sometimes view an enterprise VPN as a cumbersome, unreliable way of getting remote access.

Application disruptions, requiring frequent manual restarts, re-connection to the network, or re-authentication have often been described as a shortcoming of traditional VPNs.

**ABSOLUTE**<sup>®</sup>

## Harvest the Power of Resilience

Absolute VPN, delivered as part of the Absolute Core™ product package, is different. That's because it is the only undeletable secure access solution capable of automatically repairing or reinstalling itself if tampered with, accidentally removed, or has otherwise stopped working.

Furthermore, using a blend of sophisticated and patented Network Resilience™ technologies, your end users get improved performance and reliability when the enterprise VPN is on – especially on slow networks. In turn, they stay online no matter what, even when the network drops altogether.

Unlike legacy VPNs, Absolute VPN is software-based and enables deep insight into the activity and behavior of every device.

## Key Capabilities and Benefits

- ✓ **Network Resilience Technology** Resilient connectivity that doesn't falter, even if the network does; tunnel and network session resilience, eliminating unproductive downtime of applications; sign-in continuity, enhancing productivity, as well as video and audio optimizations to ensure quality collaboration
- ✓ **Mobile-First Enterprise VPN** Secure direct paths to applications, empower the anywhere workforce, establish stringent network access controls — security without sacrificing productivity, and designed for the latest technologies such as IPv6 and 5G networks
- ✓ **Customizable Deployment Options** Deploy seamlessly, in all environments — deploy to any device, located anywhere; hyper-resilient deployment architecture for high availability, horizontal scale-out, and zero downtime upgrades; get up and running in under an hour

## Looking for a Bigger Toolbox?

If you're looking for a simple, cost-effective enterprise VPN solution that your employees will rely on to boost their mobile experience and productivity, Absolute Core is the right choice for you. However, if you're ready to move to a software-defined perimeter that allows you to establish Zero Trust Network Access (ZTNA) principles while also providing you with rich insights on the real-time experience of your remote and mobile workers, you might want to check out Absolute Edge™.

MOST POWERFUL

### Absolute Core

#### Absolute VPN

Built from ground up for mobility and the modern edge

#### What's Included

- ✓ Patented network resilience and optimizations
- ✓ Delivering performance, reliability, and productivity
- ✓ WAN optimization controller

### Absolute Edge

All Core capabilities, plus

#### Absolute ZTNA

Best user experience for the software-defined perimeter

- ✓ Patented dynamic access policy
- ✓ Real-time risk assessments
- ✓ Reduced attack surface

#### Absolute Insights for Network

Best diagnostics and remediation for digital experience monitoring

- ✓ Patented proactive diagnostics
- ✓ Visibility outside the firewall
- ✓ Broad range of dashboards

#### ABSOLUTE EDGE ADD-ON

- ✓ **Absolute Secure Web Gateway Service**  
Delivers a secure browsing experience for all—desk, mobile, or hybrid users.
