

DATA SHEET

Absolute Assist for Secure Access

Expert IT Operations and Network Security Consulting Services

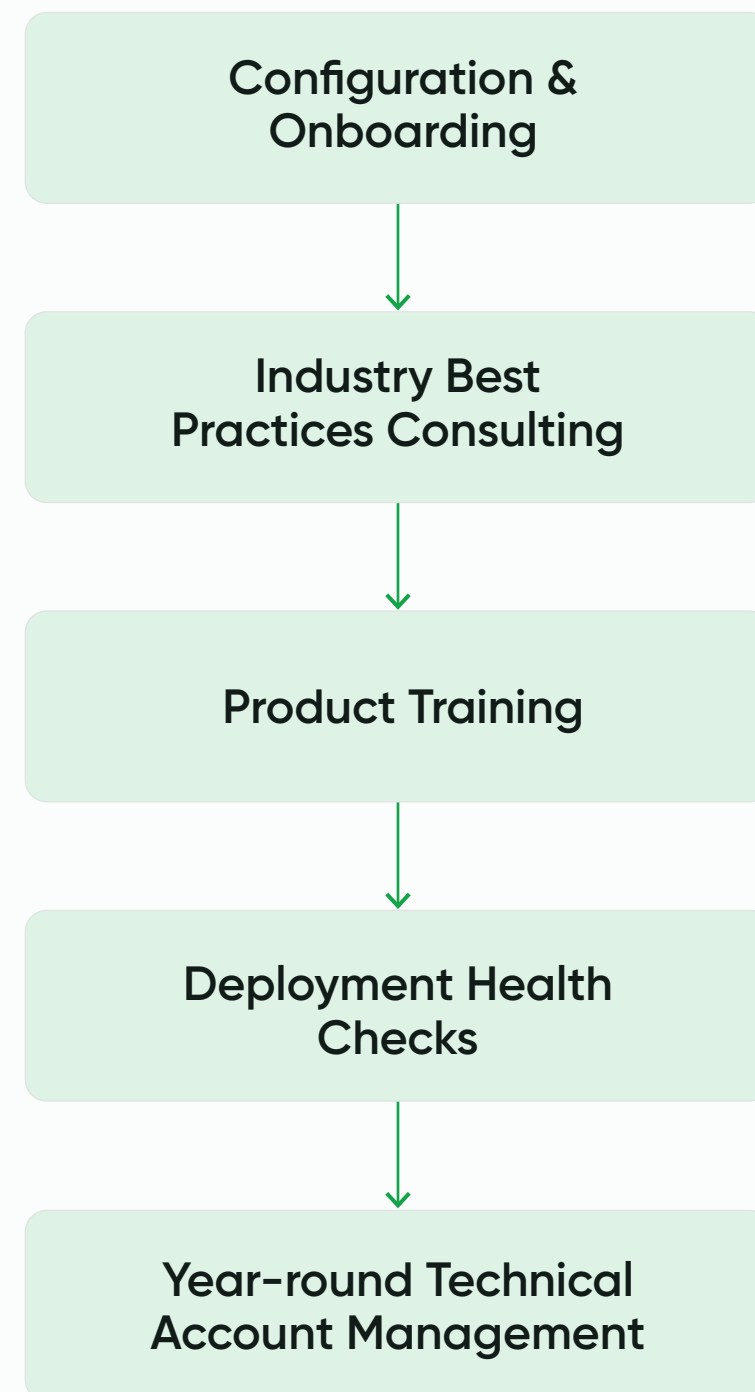

In today's work from anywhere environment, where remote endpoints are extended outside the organization, it is vital to extend the concept of cyber resilience to include network connectivity and critical applications. This requires the network to form trust with an endpoint device that uses a mix of connectivity options that are not necessarily owned by the organization.

Accelerate your path to network resilience and maximize your ROI from the Absolute platform with Absolute Assist for Secure Access, a comprehensive onboarding and optimization service that will make the most out of your investment, equip your team with best practices, and strengthen your overall security posture.

Built on years of industry experience, thousands of satisfied customers, and a foundation of proven security principles, Absolute Assist ensures that your organization is optimally protected by Absolute Secure Access, the only secure network resilient communication platform.

Absolute Assist

Service Overview

To ensure long-term success in operating and optimizing your Absolute Secure Access environment, Absolute will provide a Technical Consultant that will assist your organization in achieving the maximum business value from your investment. The Absolute Technical Consultant will help you optimize your environment, provide access to value-added services, and serve as your personal contact and escalation liaison for any support issues. Technical Consultants are subject matter experts and work directly with you to optimize the use of Secure Access in your environment. Services provided with Absolute Assist for Secure Access include:

- Monthly check-ins to review your organization's projects involving Secure Access and any open support issues
- Secure Access product deployment and configuration (for new customers)
- As needed, technical consultation for upgrades, migrations, policy creation
- Annual environment health check and executive QBR review
- One or more seats per year (based on licensed device count) in the Absolute Secure Access Certification course

Service Details

Absolute Assist for Secure Access provides unrivaled product knowledge and proven skills to help you streamline your deployment and improve operations of your Secure Access portfolio. Backed by the resources of the entire Absolute organization and armed with best practices, we work with you to minimize operational risks and realize business value from your Absolute Secure Access investment. Avoid common pitfalls by leveraging lessons learned from thousands of Absolute Secure Access implementations. Ensure high availability and performance with a direct point of contact for your technology-related and system questions or problems.

During this annual engagement, an Absolute Technical Consultant will be assigned and help to ensure your program objectives are met. Based on a clear understanding of customer needs, Absolute Technical Consultants will guide you through a variety of services including:

1. General

- Ongoing onboarding with requirements review (deployment, configuration, base implementation, training)
- Early access to pre-release versions of the product (Beta)
- Access to Absolute Secure Access Product Management once a year for product roadmap and to provide product feedback as part of remote account review
- Ongoing information sharing and configuration support based on best practices and industry trends
- Sharing documentation relevant to the use of Absolute and/or industry specific information
- Lifecycle consulting program execution

2. Technical Account Management

- Monthly check-in meetings with your Secure Access administrators
- Project status review of any internal projects involving Secure Access
- Review of open technical support cases with Absolute
- Semi-annual Executive Business Review meeting with key stakeholders from Absolute and your organization

3. Consulting

- Upgrade assistance/standby support
- Custom upgrade plan with standby assistance if issues are encountered
- General guidance and support for system enhancement or environment expansion

4. Account Health and Deployment Assessment

- Product release updates
- New feature orientation and training for console administrators as needed
- Annual health assessment of the Secure Access infrastructure
- Best practices review
- Architecture review
- Policy review
- Security review
- Future upgrade planning

5. Training

- One or more seats per year (based on licensed device count) in our Secure Access Certification course to:
 - › Ensure new staff are fully trained and certified
 - › Ensure staff stay up to date on newly released Secure Access features
